Purpose

The Department of Community and Government Services (CGS) is pleased to present this report on the Government of Nunavut (GN)'s procurement and contracting activities for the 2008/09 fiscal year.

Objective

CGS is committed to ensuring fair value and ethical practices in meeting its responsibilities. This is accomplished through effective policies and procedures aimed at:

- Obtaining the best value for Nunavummiut overall;
- Creating a fair and open environment for vendors;
- Maintaining current and accurate information; and
- Ensuring effective approaches to meet the GN's requirements.

Introduction

The *Procurement Activity Report* presents statistical information and contract detail about GN contracts as reported by GN departments to CGS's Procurement, Logistics and Contract Support section.

Contracts entered into by the GN Crown agencies and the Legislative Assembly are not reported to CGS and are not included in this report.

Contract information provided in this report reflects contracts awarded and reported during the 2008/2009 fiscal year. CGS can not guarantee the accuracy of contract information reported by departments, however, CGS makes best efforts to verify the information and ensure departments are fully aware of the reporting requirements set out in the applicable GN Policies and Procedures Manual.

Report Overview

This report focuses on the distribution of contracts awarded to corporations, organizations and sole proprietors.

Charts and tables are used to illustrate the information presented.

CGS aims to enhance its reporting of the GN's contracting activities each year as part of its commitment to ensure transparency and accountability. Many factors can influence the comparability of data. Unusually high or low values for a given year in reported data can result from a blend of several external factors that may not necessarily be obvious to a reader including such significant items as annual variations in operating budgets or capital budgets, policy revisions and one-time initiatives. Readers of this report should seek informed explanations respecting contributing factors before making judgments. Readers should not base judgments solely on the graphs and tables contained in this report. Readers should consider the many other reports and published program information made available by the GN.

When viewing such comparative information, it is important to note that certain factors such as planned changes in the GN's priorities from year to year can impact the annual results. For instance, a significant level of capital projects in one year would likely reveal a high level of Public Tendering which is the typical approach when awarding large value major works projects. A reduction in major works projects the following year, however, could reveal a related decrease in Public Tenders by value which is not necessarily indicative of any change in approach in the government's procurement and contracting practices. Therefore it is important to consider the broader perspective and context before making conclusions when assessing the comparative information presented.

Each year there is a portion of contracting activities which relate directly to the GN's ongoing role in maintaining essential services and basic programs. Other contracting activities are closely aligned to the cyclical nature of the GN's capital spending commitments.

Major capital projects typically follow a period of planning which includes inception, planning and design phases prior to the period of intense construction activity starting. The following year would normally show a large reduction in contracting activity. Comparisons made across such years may reveal an unexpected change in the level of contracts which were competitively awarded as well as the relative percentage of contracting activities by type or method.

A year in which a number of large capital projects are entering their design phase would see an increase in the volume and value of spending activity on design contracts ("A/E"). Given that the design phases of capital projects are typically followed by construction, it would be logical to see corresponding increases in the number and value of Major Construction contracts awarded ("CON").

Given that design and construction contracts are typically higher value contracts awarded through a public RFP or Tender method, whereas other types of contracts are typically of

smaller value awarded through an invitational process; a significant decrease in the infrastructure contract values with no change in the other contract values would indicate an increase in Invited Tenders or Proposals even though there is no real increase in those activities.

It is worthwhile to note that contract activities which relate to the GN's ongoing responsibility for maintaining basic services and safeguarding the health and welfare of Nunavummiut may warrant special measures to ensure prompt attention and immediate action. Depending on the nature, this may warrant engagement of expertise or necessary services outside the normal competitive process. This can occur where a delay would be injurious to the public interest, or where there is only one vendor available and qualified enough to perform the contract. Therefore in a year in which the level of capital spending is low, the proportion of non-competitively awarded contracts may appear high even though there has been no underlying change to the GN's procurement and contracting practices.

Readers are therefore cautioned from making specific conclusions upon reviewing the comparative information presented. As the GN's primary Contract Authority, CGS continues to monitor and assess annual indicators, enhance services offered to clients and client departments, and review its contracting activities regularly to ensure best practices across the GN.

Sole Source Contract Observations

Sole Source contracting practices are monitored closely. The GN believes we get the best value for our money through competitive bidding process, however, there are limited situations where the contracting regulations permit awarding contracts without competition. Section 3 of this report discusses the acceptable conditions for Sole Source contracts.

The GN continues to review the contributing factors to contracts that have been Sole Sourced. CGS also monitors the various types of contracts entered into without competition, and can offer strategic planning and other services to assist departments in decreasing their reliance on the Sole Sourcing methodology; especially where the permitted sole source criteria may not be met. For example, 'delay would be injurious to the public interest' is sometimes misunderstood, and the criterion 'there is only one party capable and available' is also sometimes relied upon without sufficient marketplace research or other appropriate data to support the request.

We will continue to work with departments towards reducing the occurrence of this contracting method. In 2008/09 Sole Source contracts, decreased in volume by 15%. The number of Sole Source contracts are more prevalent in contracts with value over \$100,000.

Note: The statistical numbers in this report do not include three (3) large categories of contracts. Those are:

GOVERNMENT OF NUNAVUT

Procurement Activity Report

	<u>2007/2008</u>	<u>2008/2009</u>
1. Medical Travel	\$35 Million (est.)	\$32 Million (est.)
2. Fuel (PPD)	\$137 Million (est.)	\$195 Million (est.)
3. Police and Laboratory Services		\$25 Million (est.)

These three high value categories total over \$525 million. Medical Travel and Fuel Resupply are the result of a competitive bidding process, Police and Laboratory Services is an extension of a previous contract with the RCMP. If we include these numbers, Sole Source contracts would value less than 10% of total expenditures. Eliminating these numbers from statistical analysis allows for a more detailed and closer examination of Sole Source contracts.

Appendix A outlines of the Definition of Terms and Abbreviations.

Appendix B entitled *Sole Source Listing* provides a listing of all Sole Source Contracts by value (> \$5,000) in ascending order.

Appendix C entitled *Contract Detailed Listing* provides a listing of all contracts (> \$5,000) and is presented by Contract Type in ascending Award Value.

The intent of these appendices is to enhance transparency of GN contracting and procurement practices by presenting meaningful and useful information on a timely basis. A threshold of \$5,000 has been established to provide focus on higher value contracts.

The contract details presented in this report reflect information recorded at the time of contract issuance. Information such as the award value represents the upper limit of a contract as established and agreed by the parties. It should be noted that the disclosure of proprietary information is typically restricted as the release of same may prove harmful to private sector interests and could expose the GN to legal and financial claims. CGS continues to operate under the advice and direction provided by the Department of Justice in this regard.

Scheduled Medical Travel

The detailed lists in Appendix B and C do not include the value of Scheduled Medical Travel awarded by the Department of Health and Social Services in 2008/09. At the request of Members of the Legislative Assembly we are providing a breakdown of dollar amounts spent with each of the carriers for non emergency medical travel:

	<u>2007/2008</u>	<u>2008/2009</u>
• First Air	\$20,444,476.16	\$11,645,226.98
• Calm Air	\$8,504,584.93	\$5,348,977.64
• Kivalliq Air Division of Keewatin Air	\$3,052,344.96	\$6,124,111.96
• Canadian North	\$2,560,893.50	\$8,340,344.51
• Air Canada	\$399,756.77	

GOVERNMENT OF NUNAVUT

Procurement Activity Report

• Unaalik Aviation (2004) Inc	\$32,033.12	\$337,082.42
• Adlair Aviation 1983 Ltd	\$51,427.54	\$20,834.68
• Kenn Borek Air Ltd	\$73,471.68	\$1,212.00
• Keewatin Air Limited	\$53,578.84	\$112,446.38
• Air Nunavut Ltd.		\$3,650.00
• Air Tindi		\$232,896.45

Fuel Resupply

The following contracts were awarded for the fuel re-supply:

	<u>2007/2008</u>	<u>2008/2009</u>
• Woodward	\$110,657,067.76	\$167,403,870.99
• Imperial	\$16,108,594.31	
• NTCL	\$9,911,866.99	\$25,768,023.78
• Northern Networks	\$78,115.00	\$108,670.00
• Aaruja & Arctic	\$174,675.00	
• RL Hanson	\$1,738.80	
• M & T Enterprises	\$3,216.14	
• Nunavut Sealink	\$113,378.44	
• Iqaluit Gas Bar	\$379,536.78	\$345,031.20
• Nunavut Eastern Arctic Shipping	\$2,751.98	\$13,981.43
• Midnight Petroleum		\$29,760.00
• Air Tindi		\$95,734.81
• First Air		\$1,672,542.96
• Air Nunavut		\$13,041.00

The Standing Committee on Government Operations and Accountability has recommended that Government record and disclose contracts entered into by Executive Council in this annual report. Government is able to confirm that there were no contracts awarded by Executive Council for the reporting period.

General Observations

The following is a brief synopsis of the statistical analysis for the fiscal year 2008/09.

The actual **volume** of contracts (number of contracts issued) is up by 5% from 2007/08 and 44% from 2006/07.

The department with the largest **volume** of contracts is CGS followed by Health and Social Services (HSS). This has remained consistent over the last 3 years of this report.

The actual **value** of contracts is up by 39% from 2007/08. This indicates a continued increase over the period of this report.

In 2008/09 Service Contracts and Purchase Orders represent the largest **volume** of contracts (78%). In 2007/08 Service Contracts represented the largest category (dollars spent) of all contracts (57%) followed by Major Works Construction (20%) and Purchase Orders (10%). For the year 2008/2009 the largest category (dollars spent) is for Construction (41%) followed by Service Contracts (20%).

The most common method of contracting by **volume** is through Public and Invitational Tenders and RFP's (60%).

62% of the total **value** of all contracts is the result of some form of competitive bidding. This represents an increase of 10% from the fiscal year 2007/08.

The **volume** of Sole Source contracts has decreased by 15% from the fiscal year 2007/08 to 2008/09 and the **value** of Sole Sources decreased by 3%.

In the Spring of 2009 the Hamlet of Pangnirtung experienced an unprecedented flooding which compromised critical road infrastructure. This emergency necessitated the Sole Sourcing of contracts for Goods and Services. 14 of these contracts, worth over \$3.1 million, have been included in this report and there may be more contracts due to this emergency identified in the 09/10 report. If not for the Pangnirtung emergency the volume of Sole Source contracts would have decreased by 18% , however, if not for the emergency contracting provision of the government contracting regulations, CGS would not have been able to supply the Goods and Services to Pangnirtung without delay. This illustrates the correct and appropriate application of the Sole Source criterion “delay would be injurious to the public interest” and is precisely why the regulations permit such a practical approach. In this report, a Sole Source awarded under the emergency provisions of the contracting regulations are identified as “SE” in Appendix C.

The contracting regulations also allow Sole Sourcing design services under \$25,000 (AE), and any other type of contract under \$5,000. This report does not analyse contracts under \$5,000, A/E contracts under \$25,000 are identified as “SA” in Appendix C.

The final criterion in the contracting regulations where Sole Sourcing is permitted, ‘Sole

GOVERNMENT OF NUNAVUT

Procurement Activity Report

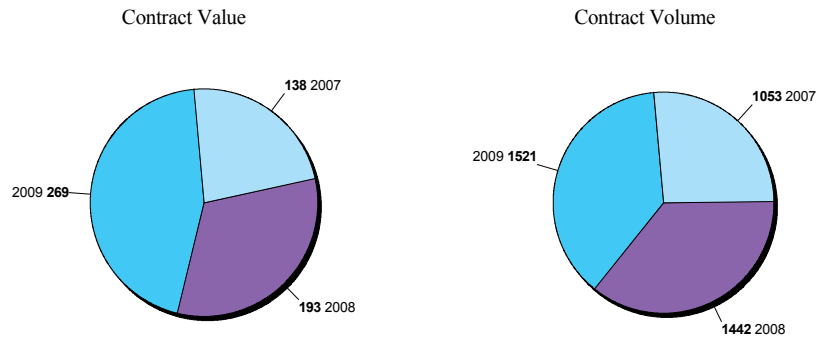

Vendor' or 'only one qualified vendor available' is more difficult to quantify, and therefore applied with the most subjectivity. CGS recommends that the best way to substantiate availability of qualified contractors and consultants, is to go to the marketplace and request competitive bids.

Summary

1. All Contracts (> \$5,000)

The charts below "*Government of Nunavut Contracting Value*" summarizes the distribution of contracts awarded by value (or contract dollars) and volume (or quantity).

Government of Nunavut Contracting Value & Volume 3 Year Comparison

The *Procurement Activity Report* has been produced for the past six fiscal years. The two charts above illustrate how the GN's contracting activities have changed over the past two years and are further supported by the details provided in the following table. In terms of contract value, the highest level of contracting activity has now occurred in 2008/09. Contracting activity value shows a 39% increase in 2008/09. In terms of volume, the number of contracts issued in 2008/09 represents a 5% increase compared to the number of contracts awarded the prior year.

The following Average Contract Value table shows that the average contract value has increased by \$43,000 over the last fiscal year. However, this does not necessarily represent an increase in spending in all activities. An analysis of Appendix C compared to the charts presented in this report, and those from past fiscal years will indicate increased spending in some areas, such as Architectural/Engineering and Construction contracts, and decreased spending in other areas, such as Service Contracts.

GOVERNMENT OF NUNAVUT

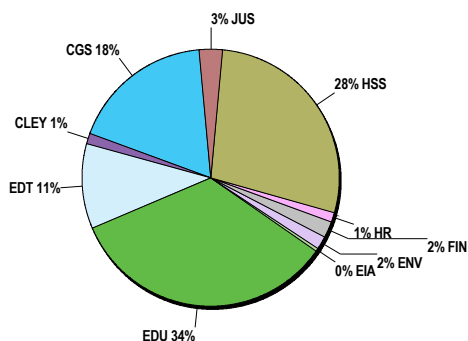

Procurement Activity Report

All Contracts (Thousands)

Type	2008/09	2007/08	2006/07
Number of Contracts	1,521	1,442	1,053
Total Value	\$ 269,411	\$ 193,317	\$ 138,020
Avg Contract Value	\$ 177	\$ 134	\$ 131

The chart below "Government of Nunavut Department Distribution ~ Value" summarizes the distribution of contracts by department.

Government of Nunavut Department Distribution - Value 2008/09

The chart above shows the level of contract activities each department engaged in during the 2008/09 fiscal year. Not surprisingly, those departments with responsibility for overseeing Nunavut's infrastructure, health, education and emergency services engaged in higher levels of contract activities. Together, HSS, CGS & EDU represent 80% of contract dollars awarded in 2008/09, and 60% of the contract volume. Specialized Goods and Services are often needed in order to address the needs of Nunavummiut, fulfill departmental mandates and meet client service expectations and needs.

GOVERNMENT OF NUNAVUT

Procurement Activity Report

Total Contract Distribution by Department ~ Value (Thousands)

Department	2008/09		2007/08		2006/07	
Community and Government Services (CGS)	\$ 48,522	18 %	\$ 56,598	29 %	\$ 38,477	28 %
Culture, Language, Elders and Youth (CLEY)	3,559	1	2,618	1	1,227	1
Economic Development and Transportation (EDT)	28,827	11	24,633	13	46,334	34
Education (EDU)	91,341	34	29,139	15	15,183	11
Executive and Intergovernmental Affairs (EIA)	1,042	-	599	-	553	-
Environment (ENV)	4,378	2	5,163	3	2,345	2
Finance (FIN)	5,528	2	3,057	2	1,430	1
Human Resources (HR)	3,320	1	3,656	2	4,517	3
Health and Social Services (HSS)	75,160	28	65,924	34	26,878	19
Justice (JUS)	7,734	3	1,930	1	1,076	1
Total	\$ 269,411	100 %	\$ 193,317	100 %	\$ 138,020	100 %

In terms of annual comparisons, the Department of Economic Development and Transportation experienced an increase in contracting activities in 2008/09 compared to 2007/08, related primarily to maintaining and upgrading airport infrastructure. The 2008/09 levels of spending show an increase of 17%.

The Department of Health and Social Services saw a large increase in expenditures in 07/08. This increase is primarily due to a \$30 million dollar medevac contract reported for the Baffin Region.

The Departments of Education, Health and Social Services and Justice all show significant increases in the value of contracting for the fiscal year 2008/09.

The Department of Education awarded contracts worth over \$81 million for repairs and upgrades to schools and residences.

CGS is the primary contracting authority for construction and transportation which accounts for a large portion of AE and CON type contracts, and virtually all Air Charters (AC).

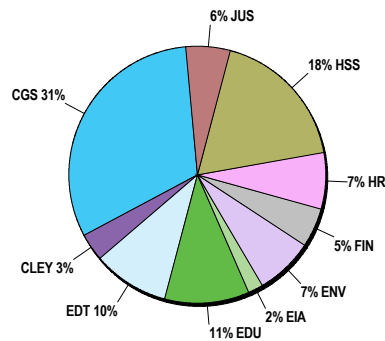

The Department of Justice awarded significant contracts worth over \$3 million for Healing Facilities in Iqaluit and Rankin Inlet.

GOVERNMENT OF NUNAVUT

Procurement Activity Report

The chart below "Government of Nunavut Department Distribution ~ Volume" illustrates the distribution of contracts by department.

**Government of Nunavut
Department Distribution - Volume
2008/09**

The Departments of Community and Government Services and Health and Social Services represent the highest level of contracting activity attributable to the specialized Goods and Services required to meet the needs of Nunavummiut.

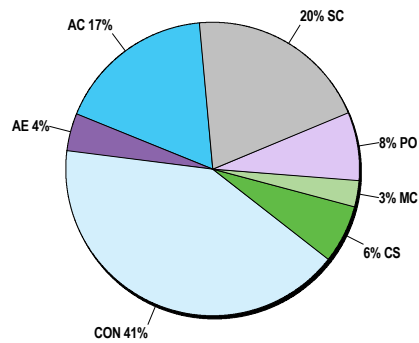

Total Contract Distribution by Department ~ Volume

Department	2008/09		2007/08		2006/07	
Community and Government Services (CGS)	478	31 %	468	32 %	379	36 %
Culture, Language, Elders and Youth (CLEY)	53	3	63	4	40	4
Economic Development and Transportation (EDT)	146	10	131	9	106	10
Education (EDU)	162	11	145	10	156	15
Executive and Intergovernmental Affairs (EIA)	29	2	20	1	16	2
Environment (ENV)	111	7	135	9	55	5
Finance (FIN)	75	5	33	2	27	3
Human Resources (HR)	108	7	79	5	39	4
Health and Social Services (HSS)	275	18	285	20	205	19
Justice (JUS)	84	6	83	6	30	3
Total	1,521	100 %	1,442	100 %	1,053	100 %

2. Contracting Types

The chart below "Government of Nunavut Contracting Value" summarizes the distribution of contract values by type.

**Government of Nunavut
Contracting Types - Value
2008/09**

When compared to 06/07 the GN's contracting activities by value increased almost two fold.

Comparative assessments must include context and consideration of large multi-year contract awards. In 2007/08 and 2008/09, medevac contracts were awarded in the Baffin and Kivalliq Regions.

In 2007/2008, \$38 Million was spent on major construction contracts, and in 2008/09 this spending increased to \$111 Million (an increase of 294%).

Given that AE awards are up by 22% (\$11 Million in 2008/09 compared to barely \$5 Million in 2007/08), it can be expected that the 2009/10 figures for major construction will show significant increases.

GOVERNMENT OF NUNAVUT

Procurement Activity Report

Contracting Types ~ Value (Thousands)

Type	2008/09		2007/08		2006/07	
Air Charter (AC)	\$ 47,047	17 %	\$ 6,021	3 %	\$ 1,916	1 %
Architectural/Engineering (AE)	11,188	4	4,866	3	3,697	3
Construction (CON)	111,589	41	37,914	20	67,055	49
Consulting services (CS)	17,248	6	6,928	4	6,335	5
Minor Construction or Maintenance Services (MC)	7,866	3	7,405	4	6,323	5
Purchase Orders (PO)	20,259	8	19,992	10	12,186	9
Service Contracts (SC)	54,214	20	110,191	57	40,508	29
Total	\$ 269,411	100 %	\$ 193,317	100 %	\$ 138,020	100 %

For the 2008/2009 fiscal year, of the 73 Minor Works contracts, 44 were publicly tendered (60%). Of the 44 that were publicly tendered, 20 were over \$100,000. 15 of these contracts were for As & When Maintenance of GN assets (75%). Publicly tendered As & When Maintenance contracts represent \$4,953,079.70 of the total MC type award value for 2008/09 (63%) (Refer to Appendix B).

In 2007/08, the volume of Service Contracts grew significantly to represent 44% of the GN's contracting volume during the year. The majority of this spending is directly related to the provision of essential services to Nunavummiut under the Departments of Health and Social Services, Economic Development and Transportation, and Education. Such services include residential or specialized care, medevac services and student housing. For the first year, 2008/09, we have moved all medevac travel to Air Charters, and this is why the Air Charters have jumped over 600% compared to values reported for Air Charters in previous years.

For the 2007/08 year, Service Contracts included medevac services for the Baffin Region. This multi-year \$30 Million contract was included in the report for the full value of the services in the award (as all multi-year contracts are reported). If this award was excluded from the 2007/08 value for Service Contracts, the 2007/08 SC value would be \$80,191,138; this represents an increase of 98% in Service Contract awards from 2006/07 to 2007/08. If the medevac contract was reported in the Air Charter category for 2006/07, the Air Charter value for 2007/08 would have been \$36,201,000; this would have shown an increase of 180% in AC awards from 2006/07 to 2007/08. For the year 2008/09, the value of Service Contracts settled at just over \$54 million. As was mentioned previously medevac contracts are now more accurately reported in the Air Charter category.

The value of all contracts from the year 2007/08 to 2008/09 shows an overall 39% increase. This increase is largely in the area of Construction Contracts.

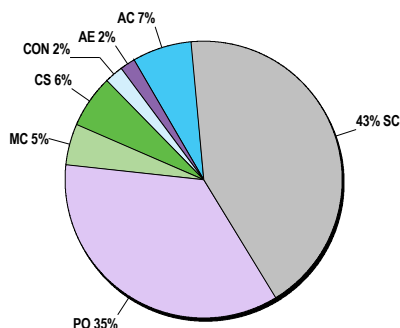

GOVERNMENT OF NUNAVUT

Procurement Activity Report

During the fiscal year *2005/06* there were only two (2) construction contracts over \$1 million. In *06/07* there were eight (8) contracts with a value of over \$1 million and three (3) contracts worth over \$10 million. In *2008/09*, construction contracts totaled over \$111.5 million. This was composed of 9 contracts worth between \$1.4 million and \$4.6 million dollars and 5 contracts worth between \$11.8 million and \$17 million. The department of Education is undertaking a number of school addition, renovation and new construction projects throughout the territory. Also, the 120% increase in spending on design services is a good indicator that construction awards for next fiscal year will be high as well. Refer to Appendix C - Construction and Architectural/Engineering Services.

The chart below "Government of Nunavut Contracting Types ~ Volume" illustrates the distribution of contracts by award method.

**Government of Nunavut
Contracting Types - Volume
2008/09**

Contracting Types ~ Volume

Type	2008/09		2007/08		2006/07	
Air Charter (AC)	106	7 %	140	10 %	64	6 %
Architectural/Engineering (AE)	27	2	24	2	23	2
Construction (CON)	33	2	16	1	15	1
Consulting services (CS)	94	6	67	5	113	11
Minor Construction or Maintenance Services (MC)	73	5	93	6	87	8
Purchase Orders (PO)	539	35	466	32	401	38
Service Contracts (SC)	649	43	636	44	350	33
Total	1,521	100 %	1,442	100 %	1,053	100 %

The volume of Air Charters increased significantly in 2007/08; up by 119% from 2006/07, due in large part to inter-community sports, wildlife & environmental studies and emergency fuel re-supply. In 2008/09, the volume of Air Charters decreased by 24%.

For the fiscal year 2008/09, the volume of construction contracts has increased significantly (up by 106%). Many of these are for the Department of Education (14 individual contracts).

GOVERNMENT OF NUNAVUT

Procurement Activity Report

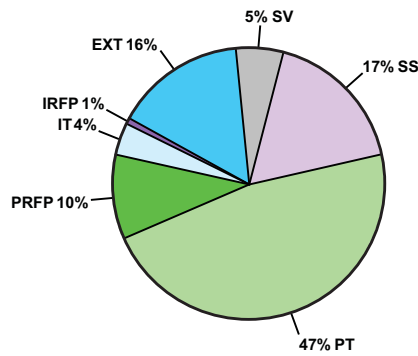

The Consulting Services volume is up by 40% from 2007/08, but still down from 2006/07. 48 of the 94 Consultant Service contracts (51% of the volume), and \$10,087,086 (58% of the value) were sole sourced. It should be noted that 19 of these 48 contracts (40%) were for Specialized Residential Care for a total of \$7,033,704 (70% of the sole source value).

The volume of Purchase Orders and Architectural/Engineering Services continues to grow. POs show a 16% increase from 2007/08, and an increase of 34% from 2006/07. AE Services are up 13% from 2007/08, and up 17% over the last 2 years. Increases in AE spending typically indicate planned increases in spending on construction in the coming fiscal years.

3. Contracting Methods

The chart below "Government of Nunavut Contracting Methods ~ Value" summarizes the distribution of contracting method by value.

**Government of Nunavut
Contracting Methods - Value
2008/09**

Competitive Tenders and proposals continue to represent the most significant contracting method employed by the GN. The GN believes that best value is received for Goods & services through the competitive tender process.

GOVERNMENT OF NUNAVUT

Procurement Activity Report

As in most jurisdictions, the awarding of contracts on a non-competitive basis is understandably limited to specific situations and must be appropriately justified. In 2006/07, the GN's awarding of contracts under Sole Source and Sole Vendor arrangements actually decreased from the prior year. The year 2007/08 shows that the combined percentage of Sole Source and Sole Vendor contracts had remained largely unchanged over the previous year however down considerably since 2005/06. The year 2008/09 shows a 5% decrease in the value of Sole Source and Sole Vendor contracts (as a portion of the total contract spend). If we consider the Sole Source contracts only, the chart indicates a 8% decrease in value. This trend is indicative of efforts by the GN to improve contracting methods.

Compared to other award methods, the values for Invitational Tenders and RFPs appears small because contracts under \$25,000 and construction under \$100,000 are awarded through an invitational process. Contracts of a higher value must be awarded through a public process, therefore values for Public Tender and RFP are higher.

For Air Charters, 80% of the volume and 6% of the value were competitively awarded. If you take out the medevac contract extensions and the emergency diesel and gasoline resupply to Baker Lake, the volume of competitively awarded Air Charters increases to 84% and the value increases to 84%. Since medevac contracts are generally not awarded on an annual basis, and emergencies are never planned, removing these contracts from the totals represents normal figures for Air Charters. Refer to Appendix C.

GOVERNMENT OF NUNAVUT

Procurement Activity Report

Architectural/Engineering contracts increased in both volume and value over the 2008/09 fiscal year. Of the 27 contracts awarded, 18 were awarded through competition (67%), and of the \$11,188 value, over \$10,269 was awarded by competition (92%).

Major Works construction is also up. 85% of the volume (28 of 33) and 97% of the value (\$108,057 of \$111,589) was awarded through publicly advertised tendering.

The Request for Proposals process is generally recommended to enter into Consultant and Service Contracts. While these contracts make up about half of the contracts the GN awarded in 2008/09 (49%), the value represents only a quarter of the GN's annual contract award value (26%).

Contracting Methods ~ Value (Thousands)

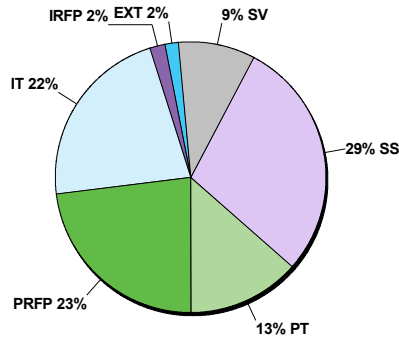

Method	2008/09		2007/08		2006/07	
Extensions (EXT)	\$ 42,086	16 %	\$ 39,560	20 %	-	- %
Invitational RFP (IRFP)	1,901	1	3,929	2	3,125	2
Invitational Tender (IT)	10,355	4	37,175	19	12,624	9

GOVERNMENT OF NUNAVUT

Procurement Activity Report

The chart below *Government of Nunavut Contracting Methods ~ Volume* illustrates the distribution of contracting methodology.

**Government of Nunavut
Contracting Methods - Volume
2008/09**

Although the numbers for Invited and Public RFPs are still low compared to Sole Sourcing, the competitive RFP process is being used more often to award contracts. The table below shows an increase of 51% in publicly advertised RFPs in 2008/09.

It is worthwhile to note that more departments are using the services of CGS Purchasing, Logistics and Contract Support to award their contracts through a competitive Tender or RFP process.

Contracting Methods ~ Volume

Method	2008/09		2007/08		2006/07	
	Count	%	Count	%	Count	%
Extensions (EXT)	25	2 %	30	2 %	-	- %
Invitational RFP (IRFP)	28	2	20	1	25	2
Invitational Tender (IT)	336	22	388	27	372	35
Public RFP (PRFP)	351	23	231	16	111	11
Public Tender (PT)	205	13	210	15	142	13
Sole Source (SS)	437	29	515	36	310	29
Sole Supplier or Vendor (SV)	139	9	48	3	93	9
Total	1,521	100 %	1,442	100 %	1,053	100 %

The chart and table above shows that the volume of Sole Source contracts has decreased by 15% from 2007/08 to 2008/09. Combined Sole Source and Sole Vendor volumes has decreased slightly by 2%.

On a proportionate basis, competitive procurement processes remain, consistently the most common method of contracting, 60% for 08/09. The volume of contracts formed from Sole Source non competitive processes decreased in the year 2008/09. In 2008/09 the volume fell to 437. Of the 437 contracts, 14 Sole Source contracts were required to respond to the Pangnirtung flood emergency. If we set-aside these 14 contracts, the volume of Sole Source contracts would be 423. This would represent a decrease of 18% in the volume of Sole Source contracts.

The Pangnirtung emergency represents a proper use of Sole Source contracting method. This emergency was not predictable. Sole Source contracts were necessary for Goods and Services to avoid public harm and the continue to deliver vital services to the residents of Pangnirtung.

The Sole Source methods are of most concern (Sole Vendors will always exist). Senior Managers and Directors need to continue to be more conscious of this and plan to avoid Sole Source contracts where possible. GN Procurement Guidelines as well as the FAA (Financial Administration Act) clearly define the acceptable conditions for Sole Sourcing. Sole Sourcing is a tool for dealing with emergency situations and public safety.

The next section of this report discusses the GN's Sole Sourcing activities in further detail. A detailed review of Appendix B will indicate where GN departments are using Sole Sourcing to assist them with implementing their mandates.

4. Sole Source Contract Distribution

As a procurement department, we strive to get the maximum value for the Government of Nunavut. This is only possible through the competitive, public bidding process. GN procurement guidelines as well as the Financial Administration Manual (FAM) set out the acceptable conditions for Sole Sourcing. Procurement guidelines explain the GN contracting regulations and provides restrictions for when a contract can be awarded without competition.

Sole Source contracting is allowed where a contract authority believes, on reasonable grounds, that one of the following conditions is applicable:

- (a) the Goods, services or construction are urgently required and delay would be injurious to the public interest; or
- (b) only one party is available and capable of performing the contract; or
- (c) the contract is an architectural or engineering contract that will not exceed \$25,000, or the contract is any type of contract that will not exceed \$5,000 in value.

Section 10. (c) of the regulations is the easiest to implement because it requires only a 'yes/no' answer. Is the contract over \$5,000? If not, it does not fall within the 'under \$5,000 criterion'. Is it a contract for Architectural/Engineering Services under \$25,000? If not, then it does not fall within the 'AE under \$25,000' criterion.

Sections 10 (a) and (b) of the regulations, however, are more difficult to implement because they are subject to interpretation of what constitutes 'public injury' or 'capable and available'.

Section 10 (a) of the regulations can be somewhat tricky in that many contracting authorities believe that public well being, in addition to health and safety, are legitimate factors to consider when deciding not to go to competition. For example, it may be more beneficial to a community to Sole Source or Invite Tenders for Major Works contracts rather than Publicly Tender, when missing sealift can sometimes delay final delivery of a facility for 2 full years. In some cases, this may be a reasonable approach. However, it should not be the only alternative if project schedules fall behind due to a lack of strategic planning and project coordination. Where there is a true emergency, such as the Pangnirtung flood and bridge collapse, is quite easy to recognize, and reasonable to implement. In a true emergency, there is no time to go to competition.

Section 10(b) of the regulations on the other hand, can be especially difficult to manage as it is open to wider interpretation and, therefore, susceptible to much broader use. There are many circumstances, however, that do legitimately fall within the s.10(b) criterion, and these are true "Sole Vendor" situations. Situations involving licenses, maintenance, patents and intellectual property or the purchase of a part component for equipment (such as a valve or pump to repair a fuel delivery truck or fire engine, or plow parts for snow clearing

equipment). Situations that do not warrant a competitive process, because there are no other manufacturers or suppliers of the specific product, are true Sole Vendor circumstances. For instance, NorthwesTel is the Sole Vendor of telephone services in Nunavut; QEC is the Sole Vendor of electricity. These are situations where there truly are no other service providers.

In some cases, it may be perceived by departments to be reasonable to rely on this clause to maintain delivery of critical programs and services at levels expected by the public or internal client departments (specialized professional services, for example, such as licenses, medical professionals and services). In many cases, departments need to bring in specialized skill sets to design programs to meet responsibilities owed to the public, and oversee that program's delivery. Sometimes, departments simply need to keep up with demand in delivering basic services to internal clients. In this situation, the interpretation of 'only one party capable and available' can be too broad, and the criterion is likely being relied upon for convenience in lieu of a lengthy and complex RFP process.

The GN believes that best value is received for public dollars through open, fair and transparent competitive procurement processes. Furthermore, CGS believes that the best way to determine a supplier's qualifications, availability and value is to seek their proposals on solution, implementation and price, and also evaluate their past experience and qualifications against defined and measurable standards.

The public's satisfaction with a department's performance and service levels, in any given program at any given time, will always be an indicator of good value for public money. In all cases where a department is considering entering into a contract under s.10(b) of the contracting regulations, CGS Purchasing, Logistics & Contracts Support is available to provide assistance on alternative contracting approaches. Where departments have already entered into s.10(b) contracts, Purchasing recommends referring to the Personal Service Contracts directive for further guidelines.

Many situations fall within s.10(b). For example, situations involving patents, copyrights and or intellectual property ownership (such as educational course design and materials or course delivery such as those offered by Nunavut Arctic College) or instances such as the purchase of a particular part or piece of equipment (such as a pump repair for a fuel delivery truck or plow parts for snow clearing). These situations may not necessarily warrant a competitive processes where they are in fact 'Sole Vendor' instances.

This is not to say that a 'Sole Vendor' situation applies when purchasing many commodities. In fact, when purchasing vehicles and or other products such as photocopiers and fax machines, etc., the GN must avoid the use of brand specific names. Requests for Tenders and Proposals must always indicate that the GN will accept bids for similar or equivalent products so long as they meet the quality and functional requirements that are established in the request.

Also, in some situations it is not advisable to issue a competitive call for tenders or proposals, by invitation or advertisement. In these situations, the delay caused by the tender or RFP process would be harmful to person(s) or end users of the good or service. These are emergency situations where if the government doesn't act immediately, there will be some form of public harm or injury. For example, sections of a roof have blown off a school or

GOVERNMENT OF NUNAVUT

Procurement Activity Report

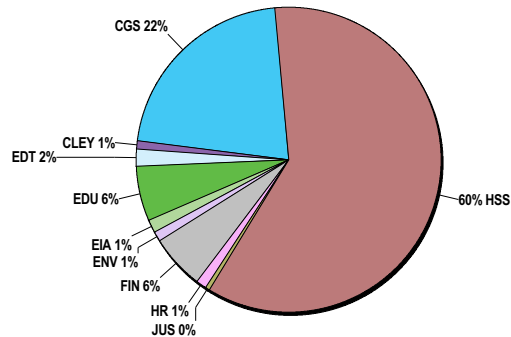

nursing station or other public building; contaminants are spilling into potable water, a fuel delivery truck requires repairs, etc. This is not to say that all emergencies or public harm is strictly a health and safety hazard. Indeed, many situations call for government action to improve the emotional health and well being of the public as well. These situations typically fall within item 3 above.

GOVERNMENT OF NUNAVUT

Procurement Activity Report

The chart below "Government of Nunavut Sole Source Contract Distribution ~ Value" summarizes the distribution of contracting method by department.

**Government of Nunavut
Sole Source Contract Distribution - Value
2008/09**

It should be noted that certain functions and responsibilities that are unique to certain departments lead to a higher propensity for this contracting method. Emergency situations with health and safety considerations or search and rescue may produce a need to enter into a contract quickly or limit alternatives or options for supply sources. Urgent situations involving the delivery of capital projects in the environmentally sensitive areas of sewage treatment, solid waste management, fuel spills and potable water have been contributing factors for Sole Source contracts on occasion. The arctic environment and a short construction season serve to complicate project delivery and contracting options. Good planning and project management practices help to alleviate the necessity to rely on Sole Sourcing.

construction season serve to complicate project delivery and contracting options. Good planning and project management practices help to alleviate the necessity to rely on Sole Sourcing.

The volume (quantity) of Sole Source contracts and the total value (contract award value) of Sole Source contracts has decreased for the fiscal year 2008/09. The decrease is roughly 15% in volume and 3% in value over 2007/08.

In 2008/09, the two departments which had the highest value and volume of Sole Source contracts were the Departments of Health and Social Services and Community & Government Services. Each of these departments have responsibilities for providing essential basic services which may impact the prevalence and frequency of this form of contracting method on occasion.

Note: For the fiscal year 2006/07, the Department of Economic Development and Transportation made a change to their reporting practice. Many of the contracts with Hamlets represent "Sole Supplier" situations where the Hamlet was the only service provider able to service operations of Nunavut Airports. This change in reporting methodology explains the significant decrease in Sole Source contracts reported by EDT.

A detailed list of contracts awarded without competition can be viewed in Appendix A.

GOVERNMENT OF NUNAVUT

Procurement Activity Report

Sole Source Contract Distribution ~ Value

(Thousands)							
Department	2008/09		2007/08		2006/07

Total	\$	46,674	100 %	\$	48,135	100 %	\$ 23,047 100 %

In 2006/07, of the \$12.3 million that the Department of Health and Social Services awarded through Sole Source contracts, just over 34% went toward securing specialized care and health services and/or residential care.

In 2008/09, 46% of the number of Sole Source contracts for the Department of Health and Social Services were for providing specialized residential care. This accounted for 86 Sole Source contracts and \$16.5 million.

The department of Community & Government Services (CGS) has the second highest number of Sole Source contracts and the second highest value. CGS is responsible for delivering many of the basic services of Nunavummiut (water, sewage, fire protection, etc.). In the event of emergencies, CGS plays a major role in delivering solutions. In these emergencies, Sole Source contracts are expected. For example, during the Pangnirtung flood in 2008 (spring), 14 Sole Source contracts worth over \$3.1 million were required.

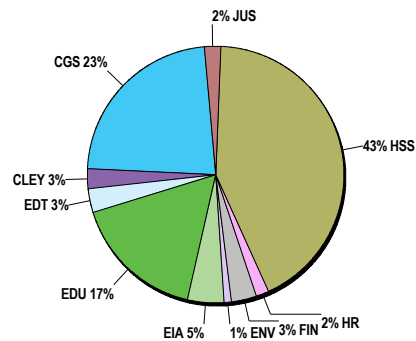

It is worthwhile to note that CGS responded to a number of other emergencies in the territory last year including Pangnirtung; Taloyoak (Hamlet Office Roof and Mould problems), Gjoa Haven (Water Line), Hall Beach (Sewage Repairs), Cambridge Bay (NAC Sewage Tank), Sanikiluaq (Noxious Fumes Investigation at Nuiyak School). CGS was able to immediately and practically respond to all these emergencies due to the emergency contract provision of the GN contracting regulations.

GOVERNMENT OF NUNAVUT

Procurement Activity Report

The chart below "Government of Nunavut Sole Source Contract Distribution ~ Volume" illustrates the distribution of contracting methodology.

**Government of Nunavut
Sole Source Contract Distribution - Volume
2008/09**

On a proportionate basis, the Department of Health and Social Services issued the largest number of Sole Source contracts, followed by the Department of Community & Government Services.

Sole Source Contract Distribution ~ Volume

Department	2008/09		2007/08		2006/07	
Community and Government Services (CGS)	100	23 %	72	14 %	39	13 %

Environment (ENV)	4	1	56	11	3	1
Finance (FIN)	14	3	11	2	12	4
Human Resources (HR)	7	2	18	3	25	8
Health and Social Services (HSS)	186	43	195	38	137	44
Justice (JUS)	9	2	14	3	-	-
Total	437	100 %	515	100 %	310	100 %

A department cannot truly know if there is only one qualified supplier available if it does not consult the marketplace through a competitive process. GN Departments need to continue to work toward reducing the occurrence of Sole Source contracts. The GN believes that best value is received for public dollars through open, fair and transparent competitive procurement processes.

Appendix A: **Definition of Terms and Abbreviations**

Terms

"Goods": In this report, "Goods" means contracts for the purchase of Goods that are primarily entered into by *Procurement, Logistics and Contract Support Services* on behalf of Government of Nunavut departments, generally referred to as Purchase Orders.

"Invitation": An Invitation is a contracting method where Tender or Request for Proposal documents are sent only to contractors or suppliers specifically selected to submit tenders or proposals.

"Invitational Tender": An Invitational Tender (IT) are those requests for which tender documents are sent only to contractors or suppliers specifically selected to submit tenders. For readers not familiar with GN contracting practices, please note that outside Nunavut, Invitational Tenders are generally referred to as Solicited Tenders.

"Invitational Request For Proposal": An Invitational Request for Proposal (IRFP) are those requests which are sent to contractors or suppliers selected to submit proposals.

"Purchase Orders": In this report, "Purchase Orders" means contracts for purchase of Goods, primarily entered into by the Department of Community and Government Services on behalf of Government of Nunavut departments.

"Public Tender": A Public Tender are those tenders which are publicly advertised. For readers not familiar with GN contracting practices, please note that outside Nunavut, Public Tenders are generally referred to as Invitational Tenders.

"Request For Proposal": An Request For Proposal (RFP) has been defined as follows, "when the government knows what end result should be, but not necessarily how best to achieve it; therefore Government seeks *proposals* on methods, ability, and price".

"Sole Source": A Sole Source is best defined by setting out the criteria. The Government of Nunavut contract regulations, under the Financial Administration Act, allow Sole Sourcing of contracts where a contract authority believes, on reasonable grounds, that one of the following conditions is applicable:

- (d) the Goods, services or construction are urgently required and delay would be injurious to the public interest; or

- (e) only one party is available and capable of performing the contract; or
- (f) the contract is an architectural or engineering contract that will not exceed \$25,000; or
- (g) the contract is any type of contract that will not exceed \$5,000 in value.

"Tender": Tenders may be obtained by public advertisement or private invitation. It should be noted that, generally, the value and type of contract will determine the type of tendering to be used.
